

## Physician Need Analysis

1. What is the geographic boundary of the area to be served by a new physician?

---

2. How many people live within the area to be served? (GMENAC studies recommend approximately 2,200 population to 1 family practitioner/general practitioner.):

---

3. How many people within that area would use the services of a new physician? (The United States Public Health Service estimates that 4,200 patients' visits a year is adequate to support a physician.):

---

4. Can patient fees support the operating expenses of a new practice? \_\_\_\_\_

5. What is the age, training and experience of physician(s) already in the community:

---

---

---

6. What is their attitude toward recruitment? \_\_\_\_\_

---

---

---

7. Where is the nearest referral center? \_\_\_\_\_

8. What on-site consultations are available? \_\_\_\_\_

---

---

9. Where would the physician locate his/her practice? \_\_\_\_\_

---

---

10. What type of patients is the area hospital equipped to serve? \_\_\_\_\_

---

---

---

11. What is the extent of managed care? \_\_\_\_\_

---

---

---

12. Percent of Medicare and Medicaid in the population? \_\_\_\_\_
